 **dropsuite**

# Data Backup & Archive.

Automatically protect, recover and ensure compliance for business-critical data.

Manage Protect email backup, brought to you by Dropsuite, is a secure, user-friendly solution to protect business-critical email data.

It offers efficient storage, strong encryption and seamless remote backup, as well as intuitive versioning and archiving that meets Australian compliance requirements.

Whether preventing data loss or enabling quick disaster recovery, Manage Protect delivers reliable protection and great ROI.

- ✓ Securely preserve files for peace of mind
- ✓ Australian data centres retain data sovereignty
- ✓ Simple user administration
- ✓ Find files quickly
- ✓ Create audit logs easily
- ✓ Reduce the effort associated with archiving
- ✓ No storage limit worries

# Dropsuite: powerful and reliable.

## COMPATIBLE

Integrates with Microsoft 365, Google Workspace, and IMAP/POP3 servers, backing up all email instances.

## EASY TO USE

Single-panel dashboard offers admin and user management, role-based access and SSO support.

## POWERFUL SEARCH

Lightning-fast search offers 20+ search criteria, no limitations of timeouts, advanced search tools including saved searches, unified across products, drives and email.

## SECURITY AND COMPLIANCE

TLS 1.2 and AES256 encryption, supports MFA, and aids in GDPR and HIPAA compliance. All data centres are SOC2, FISMA, ISO 27001, and SSAE-16 compliant.

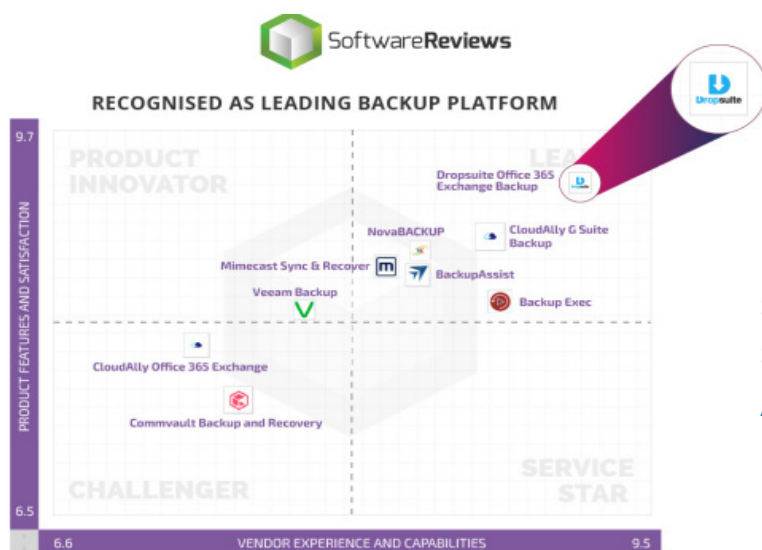

## FAST RECOVERY

Features like granular and one-click restore ensure quick and easy retrieval of lost or corrupted data.

## VALUE AND PERFORMANCE

Dropsuite's transparent pricing, unlimited retention policies and top-tier support deliver exceptional value.

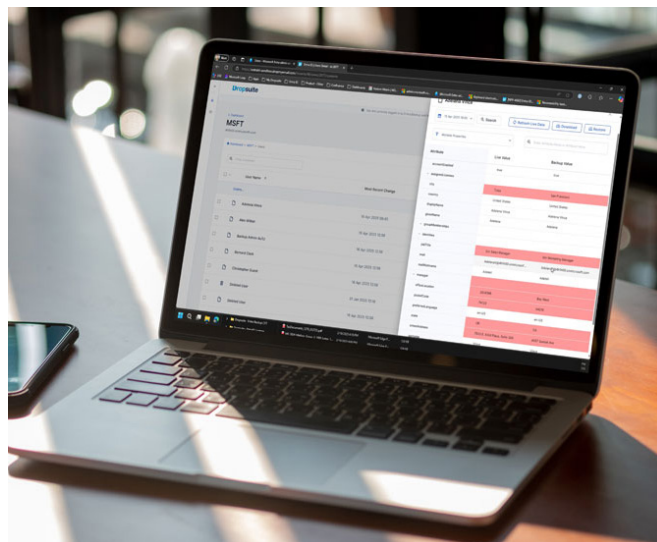

Dropsuite's Email Backup has been named Top Leader in SoftwareReviews Email Backup Solutions Data Quadrant Awards two years in a row.

# Dropsuite Entra ID Backup.

## Built for MSPs to Strengthen Security and Data Protection

As cyber threats increasingly target identity systems, Microsoft Entra ID has become a major attack surface. Dropsuite Entra Backup secures access and identity configurations from unauthorised changes, deletions, and threats.

### What Could Go Wrong?

1. **Ransomware Attack:** A client is hit. Entra is locked down.
2. **User Error:** A junior admin disables a critical conditional access policy.
3. **MSP Oversight:** During onboarding, app service principals aren't replicated. Automations break.

### Dropsuite Entra Backup cuts downtime and accelerates recovery:

- ✓ **Unlimited retention:** Keep Entra ID history beyond Microsoft's 30-day limit.
- ✓ **Granular restores:** Recover specific policies or settings instantly, reducing support hours.
- ✓ **Change tracking:** Search config edits by attribute or past value without sifting through audit logs.
- ✓ **Rapid resilience:** Undo accidental deletions, admin errors, or ransomware hits in seconds.

# Why Manage Protect?

Experience the difference: Australia's largest Dropsuite provider with specialist resources for painless onboarding and migrations.

- ✓ Local product specialist support
- ✓ Simplified monthly billing – no pro rata or lock-in contracts
- ✓ Dedicated account manager who understands your business
- ✓ Marketing support and resources
- ✓ Australian owned and operated since 2008
