Outperformer in
the 2025 GigaOm
Radar for
Anti-Phishing

Industry Leading Email and Collaboration Security.

Over 90% of cybersecurity attacks start from a malicious email and 75% of ransomware attacks are email-borne.

Avanan is Manage Protect's anti-phishing, anti-malware software solution protecting email and cloud applications including Microsoft 365, G-Suite, Dropbox and Slack.

Avanan sits at the cutting edge of email security with its patented inline protection and innovative machine learning.

Block sophisticated social engineering attacks

Effective defence before the inbox securing inbound, outbound and internal emails from impersonation, zero-day phishing and Business Email Compromise.

Protection from malware and ransomware

Scans every message, file and application for malware, blocking attacks that evade traditional scans. Cleans files to deliver a safe version in under two seconds.

Identifies and remediates compromised accounts

Analyses login events and end user activities across every cloud application, identifying unusual, potentially malicious behaviour.

Data Loss Prevention

Detects sensitive data sharing via email and collaboration apps and immediately limits data exposure. Inappropriately shared data is blocked or “unshared” to prevent data leaks.

Protects against account takeover and insider threats

Monitors over 100 indicators to identify compromised accounts. Real time scan and quarantine of internal emails + deny and block suspicious logins to prevent lateral attacks.

Good for clients. Great for MSPs

Avanan provides complete, full-suite protection that is constantly evolving to defeat new threats, while providing security admins with an easy-to-deploy and manage platform, making your security offerings easy and efficient.

- ✓ Proven protection: peace of mind
- ✓ Monitor one simple dashboard with actionable insights
- ✓ Minimal false positives
- ✓ Easy installation with no MX record changes required
- ✓ Multi tenancy management from a single portal

"Avanan has the industry's best malware catch rate (99.9%) rated by NSS labs"

More than email.

Avanan extends beyond email by searching, managing and protecting any SaaS to enable your clients to collaborate with confidence.

Add ons

Archiving

Store all processed emails for up to seven years. Search and export on demand; import emails from existing archive.

IRaaS

Incident Response as a Service leverages our team of experts to manage end-user reports of suspicious emails and requests to release quarantined emails. Alleviates avalanche of email tickets for support team; Avanan's experts resolve tickets within SLA.

DMARC

Provide visibility to all DMARC failure reports with built-in search engine, grouped by domain and services. RUA mailbox to ensure full-scale DMARC failure reporting with actionable recommendations and changes to DMARC policies.

SAT

Comprehensive AI-powered training modules for an effective employee learning experience with phishing simulations.

HEC ERM

Get real-time alerts for compromised credentials + instantly remediate exposed accounts with one-click actions.
