

POWERED BY BREACH SECURE NOW

Empowering teams to be secure.

MPaware is the MSP platform that assesses, trains and measures your customers' cyber security readiness, building teams that are secure, productive and ready for AI.

People are still the biggest risk.

Train them to be your strongest defence.

Firewalls, endpoint protection and email filters are essential, but the biggest security risk still walks in the door every morning.

68%

of security breaches involve
a human element

45%

of APAC SMBs had a cyber
incident last year

1 in 3

ANZ employees is likely to
engage with a phishing attempt

Low awareness = financial
loss, reputational damage and
regulatory penalties

What is MPaware?

Built by an MSP for MSPs, MPaware is designed to make your life easier and deliver security and value to clients.

1. Cinematic training

Award-winning 'infotainment'-style training combines engaging video content with essential education.

2. Up to date content

New training is regularly released to stay on top of modern threat such as vishing, deepfakes, and AI-generated phishing.

3. Partner Portal

A single pane of glass to provision customers and run dark web scans, phishing simulations and employee evaluations, even on prospects.

4. Self-provisioning NEW

Set up new customers instantly yourself, with no more waiting on service ticket emails.

5. Policy attestation

Use the provided templates or upload client policies to track for compliance and alignment with frameworks like SMB1001

6. White-labelled

A cyber security training solution that fits seamlessly into your existing MSP stack, under your own brand.

7. Customer dashboards

One place to store incident response plans, backup processes, emergency contacts and team leaderboards.

8. Cross-client reporting NEW

Get an easy, single-view overview of security posture and training progress across every customer.

What this means for MSPs

Reduced client risk

SAT is proven to lower breach likelihood

Save time

Automation means less manual admin

Recurring revenue stream

White labelled and ready to sell

Client retention

Visible results and measurable risk scores build trust

“MPaware is a fully-fledged cybersecurity training platform that’s easy to implement and makes our job a lot easier. With Manage Protect’s support, it’s a no-brainer.”

Mark Giles, Phrixus Technologies

High quality cinematic videos boost engagement

AI Enablement Training

New AI awareness modules build the confidence and judgement employees need to use tools like ChatGPT and Copilot responsibly.

✓ AI Fundamentals

Plain-English training on what generative AI can, and can't, do.

✓ AI Cybersecurity

How to use AI tools securely and stay compliant across common platforms.

✓ AI-driven threat awareness

Recognising AI-manipulated phishing, deepfakes and other AI-enhanced social engineering.

✓ Ongoing reinforcement

Short, regular update reels keep staff current as AI tools and risks evolve.

Pricing built for growth

A simple, transparent pricing model with no upfront costs makes MPaware an easy addition to any client offering, no matter their size.

- **Straightforward per-user monthly cost**
- **Flexible monthly billing** with no minimum contract term.
- **No minimum user count** so it scales down to your smallest clients too.
- **No upfront costs or subscription fees.**

Manage Protect, dedicated to empowering our partners.

- **Talking to us is easy**

Dedicated partner managers based in Sydney and Melbourne, plus local phone, email and chat for technical support and provisioning.

- **Billing is easy**

Simple month to month agreements and PSA integration. No long contracts, no commitments.

- **Scaling is easy**

We are committed to working with smaller MSPs to help them thrive and we've been doing it for 15 years.

- **Onboarding is easy**

Flexible Internal Use Licences, trials and one-on-one training and onboarding for partners.

- **Managing customers is easy**

With a single provisioning and management portal for all our services.
