

M365 security and monitoring for MSPs.

Achieve continuous M365 security and compliance best practice with Octiga, Manage Protect's easy and affordable SaaS cloud security solution.

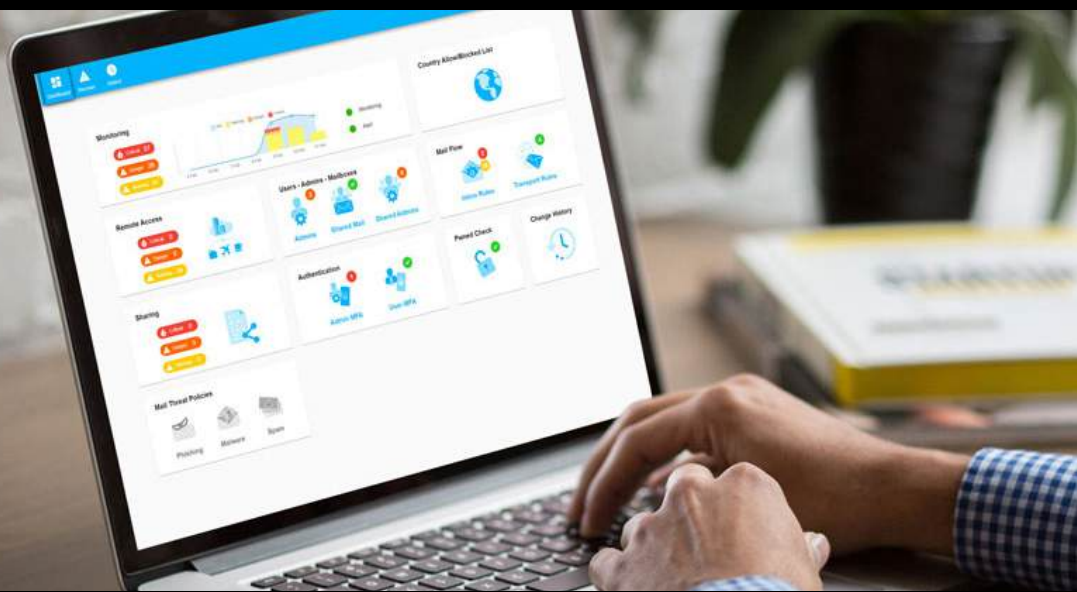

Microsoft 365 Security Made Simple.

Automate risk detection, apply best-practice security baselines across all clients, and save hours of engineering time every week... so you can focus on growth.

- ✓ Best practice security across M365: Exchange Online, EntraID, Teams, SharePoint, OneDrive and Intune
- ✓ 24/7 monitoring & geo alerts
- ✓ Single pane dashboard – one interface to replace M365's many portals
- ✓ Onboard new clients in minutes
- ✓ Fix identified security issues with a single click
- ✓ Integrate seamlessly with your PSA

Built by MSSPs for MSPs.

EVERYTHING IN ONE PLACE

One dashboard, continuous monitoring and auto-remediation that frees your team from alert overload and gives you 24/7 peace of mind.

CATCH BREACHES IN MINUTES

Maintain security standards 24/7. L1's can triage risks with precision, with complete context provided by Octiga's incident-level alerts with system events.

CONSISTENCY

Easily apply security baselines rapidly, and align security postures across clients. Customisable best-practice security settings are ready to deploy.

ROAD MAP

Frequent product updates and enhancements, backed by a comprehensive roadmap that ensures continuous innovation.

Manage Protect makes Microsoft easy

Manage Protect provide tools, access, training and programs to centralise and automate Microsoft licencing management and security without the complexity. We'll reward you with discounts and make issue resolution faster and less painful.

- ✓ Discounts and rebates
- ✓ Easy provisioning and permissions
- ✓ Local support + ticket escalations
- ✓ Security enhancements
